MAINTENANCE TIPS

保养须知

漆面产品

特佳地板漆面产品的涂层为 100% 亚克力 UV 漆，极为光洁透彻，无需特别保养，严禁打蜡，因为任何蜡都无法与晶莹的亚克力漆相比，使用中只需用半干的墩布擦拭即可。若地板使用一段时间后出现难以处理的脏迹，可使用我们建议的皂水做为日常清洁。皂水是地板及其他木制表面理想的清洁产品，地板清洁的频率以地板的使用程度为准。

皂水使用说明：

- 1、用吸尘器或者拖布做日常清洁。
 - 2、在使用之前要小心的摇动，搅拌，125 毫升的皂水要混合 5 升的温水。
 - 3、用尽量少的水做地板清洁，将一些皂水撒在地板上停留一会，这样可以使它溶解地板上的脏东西。然后用吸湿性比较强的抹布或者棉花把脏的皂水擦净。
 - 4、建议使用两个桶，一个装皂水混合溶液，一个装干净的水以做冲洗。可以经常地用沾有皂水的抹布或者拖布擦拭地板，这样就可以不断的在地板上留有新的保护膜。
- 配比：1 升：300 平米

Lacquered products

TEKA good floor lacquered products for the 100% UV lacquered, very clean and thorough, no TEKA maintenance, is strictly prohibited waxing, because any wax can not be compared with the crystal acrylic paint, the use of only a semi-dry mop Wipe it. If the floor after the use of a period of time difficult to handle the dirty track, you can use our recommended soap for daily cleaning. Soap is an ideal cleaning product for floors and other wood surfaces. The frequency of floor cleaning depends on the level of floor use.

Soap water Instructions for use:

- 1, with a vacuum cleaner or mop do daily cleaning.
 - 2, before use to be careful shaking, stirring, 125 ml of soap water to mix 5 liters of warm water.
 - 3, with as little water to do the floor clean, some soap water will be scattered on the floor stay for a while, so that it can dissolve the dirt on the floor. And then use a relatively strong hygroscopic cloth or cotton to wipe the dirty soap water.
 - 4, the proposed use of two barrels, a mixed solution containing soap water, a clean water to do washing. You can always wipe the floor with a cloth dampened with soap water or a mop, so that you can keep a new protective film on the floor.
- Proportion: 1 liter: 300 square meters

油面产品

特佳地板油饰产品的涂层，均为可食用的植物油。涂油产品内敛温润，奢华大气，但需要一定保养。通常需 8-10 个月进行一次专业养护，养护后产品即刻变新，涂油产品的特点即为“常新”！涂油地板带给您一种特殊的表面处理效果，并且给您提供了一个愉悦自然的生活环境。为了能够延长涂油地板的使用效果，在安装地板后，建议用维护油做一次维护，可手工或机器抛光，抛光后地板更具耐久性。

维护油使用说明：

- 1、先做基础清洁，清洁后让地板干燥至少 8 小时，至完全干燥。
 - 2、涂油前仔细摇动维护油的包装，使其均匀。使用棉布涂布。
 - 3、涂油过程中抛光：将维护油抛进木材非常重要，持续抛光直到木材表面饱和、均匀。
 - 4、在温度为 19-20 度得情况下，24 小时后地板才可以再次使用。在干燥过程中勿接触水。
- 配比：100 毫升：4 平米
注意：为了避免被保养油浸泡过的棉布和垫子的自然，请在用完后将他们投入水中或烧掉。

Oil products

TEKA floor oil products coating, are edible vegetable oil. Oiled products introverted warm, luxurious atmosphere, but need some maintenance. Usually takes 8-10 months to conduct a professional conservation, conservation products immediately after the change, the characteristics of oil products is "often new!" Oil-filled flooring gives you a TEKA surface treatment effect, and to provide you with a pleasant natural living environment. In order to extend the use of oil-coated floor, after the installation of the floor, it is recommended to do maintenance with a maintenance oil can be hand or machine polishing, polishing the floor more durable.

Maintenance oil instructions:

- 1, do the basis of clean, clean and let the floor that dry at least 8 hours to completely dry.
 - 2, before oiling oil carefully shake the maintenance of packaging, make it uniform. Use cotton cloth.
 - 3, the oiling process of polishing: the maintenance of oil thrown into the wood is very important to continue polishing until the wood surface saturation, uniformly.
 - 4, the temperature is 19-20 degrees in the case, 24 hours before the floor can be re-used. Do not expose to water during drying.
- Proportion: 100 ml: 4 square meters
Note: To avoid spontaneous combustion of cotton and mat impregnated with maintenance oil, put them in water after use, or burn
